Marking Pen
Level

Fishing Pole Holder

Mounting Bracket

HW Pack

Professional installation is recommended. If you choose to not have this product installed by a professional, we highly recommend that you exercise caution, care, and patience when installing this product as it involves drilling holes into your cart's body.

1

To begin, attach mounting bracket to fishing rod holders upper mounting holes using the 10mm x 60mm countersunk bolts.

Place rod holder w/bracket on outside of grab bar at desired height.

NOTE: Take into account if the holder is mounted too high, low hanging objects could damage the rods. Mounted too low and the rods could scrap the ground.

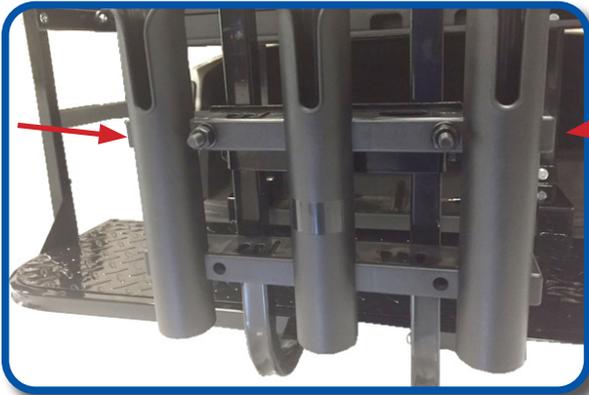

3

While rod holder is in position, mark two holes in bracket as shown. Use small level to ensure rod holder is correctly positioned.

4

Using a 11/32" bit, drill marked locations all the way through grab bar tubing. Attach rod holder to grab bar using 8mm x 40mm bolts.

INSTALLATION COMPLETE
